

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/gc-21-385	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The postoperative follow-up data in particular will be shared, and we also found the advantage of nanocarbon negative imaging technology in the fifth stage of CKD with SHPT, which has seldom been provided in previous studies.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique may be updated over time.
7	To whom will you share the data?	Head and neck surgery and thyroid surgeons who are interested in studies of nanocarbon negative imaging technology.
8	For what type of analysis or purpose?	For analysis to evaluate the perioperative and outcomes of the application of nanocarbon negative imaging technology in the fifth stage of chronic kidney disease with SHPT patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: hezhixiangs@sina.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
